

# CHIP CARD READER PROGRAMMER USING PC

Prepared by: Loh Kok Ming

## ABSTRACT

---

At the first main body of my report I would describe my project to you and what is the main objective of my project also included in the introduction after that, is the circuit diagram of my project, I would explain how it work. The PCB layout would include the PCB design and some summary of it. The most important point and interesting information are inside the 6.0 Construction which including the usage of EEPROM and parallel control and the port input and output function, after that is the result and analysis, how I testing and analysis are inside it.
