

# ELECTRONIC WASHING MACHINE CONTROL

Prepared by: Chan Chun Kiat

## ABSTRACT

---

With reading this project report, the reader would know more detail about electronic washing machine control circuit. And understand how the construction of this project being progress.

At the first part of this project, there has briefly explains the objective for doing this project and introduction about the title of the project which will let reader more clearly about this project. This reports also provided the explaining of how the works being carried out through the whole progress of the project.

Second part of this project will mainly concern toward the analysis of the circuit. This part will provide block diagram and circuit diagram with explanation in more details. There also list out all the needed components for doing this project and some components description also.

The continuous part is including the encountered problem, testing and the result of this report. At the last of the report also provided the cost of this project, references of the information being used and the appendix for some specific components.
