

LED SANDGLASS

Prepared by: Yeo Haw Jiun

ABSTRACT

Now, I like to ask you a question don't you feel bored playing around with the traditional sandglass, but now you don't feel that with electronic LED Sandglass. It is a combined of 20 colorful and attractive Light Emitting Diodes. You can just feel the attractiveness of it, especially when the surroundings are dark with only the LED Sandglass turned on.

User can also use the LED Sandglass to time the time of boiling an egg: he/she can see the attractive display of sandglass while waiting for cook for the eggs. Time can be adjusted if user wants the egg to be well cooked.
