

DC MOTOR CONTROL

Prepared by: Loo Kah Ter

ABSTRACT

I've chosen this 'DC Motor Control' as my final semester project course because I found that motor has a very wide range in its application. Almost everywhere in this world is using this concept. Furthermore from a young child who play remote control car till an old man who I using a wheelchair as their transport.

Finally, this report is basically about how does a motor can be control using a very simple circuit. How do this circuit works, constructing, testing and the where does it works in this world.
