

TELE-VISAGE

Prepared by: For Loe Sieun

ABSTRACT

Objectives

1. To learn more laboratory skills as we didn't learn from the normal college lab session such as soldering, drilling, PCB layout design
2. To understand the function of the component more detail and apply the uses of the component
3. To apply the knowledge that I had gained through this course
4. To work independently and learn how to troubleshoot the circuit and also learn how to solve the problem that I had faced.
