

COMPONENT ANALYZER

Prepared by: Chan Tong Yeow

ABSTRACT

This is a complete report about the information of 'component analyzer'. A simple but extremely useful component lead's tester uses to determine which lead is which and whether it is functional. An easiest concept to be applied on, 'switch on-plug-in-display shown' by following merely 3 steps, all functions will be satisfied. 'analyzer' – a most convenient and demanding tool for everyone, whenever you deal with electronic and electrical field.
