

INTEGRATED PROPERTIES PROTECTION SYSTEM

Prepared by: Donny Wong Sui Dat

ABSTRACT

Do you know someone is passing by your house at night? Or someone is attempting to break in by walking around your house to see the condition of your house. With the normal alarm system, you are not able to know.

By using Integrated Properties Protection System, you are able to solve these problems. You never need to worry about whether your door is locked or not, you can know someone was passing by your house last night.

In this project report, it will contain detailed information on this system. It will show the concept and the working of the system. It will also show that this system will be able to use practically in the real world.
