

# **GEIGER COUNTER**

Prepared by: Yeoh Kai Siang

## **ABSTRACT**

---

This paper will introduce you what a Geiger counter is and what radiation will be. Different kinds of radiation are also described in details.

Descriptions of the components that are used are also included in this report. Furthermore, a typical circuit diagram used by other Geiger counter and the circuit diagram for this project is included so as the reader could make a comparison.

The contents of this report are written in an understanding concept where anybody would understand even if he or she had no knowledge on engineering at all. There are photos and illustration for a better understanding and a better guide to anyone who are reading this project.
