ELECTRONIC WAR GAME (PART 3)

Prepared by: Chua Kang Seng

ABSTRACT

My project tile is 'Electronic War Game (Part 3) - Targets'. Within the course duration (week 1 to week 13), I had tried to design my own circuit. In order to let readers to understand how the circuit operates, this report is prepared as introduction and guidance for circuit understanding. In this report, I will describe my project step by step from minor part to most important part, including the description of the way in preparing for all needed components before the practical work, the process of constructing the circuits. The analyze section of report will highlight the theoretical operation of my project circuit.
