

HOSEPIPE CONTROLLER

Prepared by: Tai Eng Hock

ABSTRACT

During the progression of my project, my approach has, however been based on the fact that I am a student seeking for knowledge and experience. This report is written strictly focusing on the development of the project in terms of engineering method and analysis. As I noticed the range of experience in practical mean excess P.C.B and the natural behaviors of circuit operation suppose to be conducted in practical conditions in order to acquire fully comprehension.
