ABSTRACT

The contents of my project were included list of illustrations, body of the report, conclusion, references and appendix.

On the list of illustration part, the diagram will be explain and describe clearly to let the reader to have clear view of the project.

On the body section, there had been separated to a few part such as introduction, construction of the project, result and analysis. It is giving the reader the view of the design and circuit diagram. Details of the performance of the project will be clearly described.

The conclusion will give the reader what had been done, solution of the troubleshooting, and the summary of all the project outcomes.

The references that had been used to refer to finish the project will be show n on the references pages. And the data sheet and all the components characteristics will be shown in the appendix.
