

AUTO TEMPERATURE RECORDER

Prepared by: Ng Wen Chun

ABSTRACT

The project report can be divided into 9 main parts. It consists of Objectives Introduction, Construction, Circuit Analysis, Program Analysis, Problems Encountered and Solutions, Testing, Result and Further Improvements, Costs Calculation and Conclusion.

The objectives part states the objective of this project course and the objectives that I am going to achieve after finished this project course. The introduction part contains the brief and overview of my project - Auto Temperature Recorder. Next, is the construction part which consists all of the process that I passed through to come out with this project.
