

OSCILLOSCOPE WITH TV DISPLAY

Prepared by: Teo Kai Shen

ABSTRACT

In this project, you can know the way of making a simple oscilloscope and then display the waveform on a TV. The entire process during my project will be written in this report.

In the construction chapter,, they whole process that I took during the project will be discussed in detail.

In the analysis chapter, the circuit diagram of my project will be shown and the operation of the circuit will also be written in this part.

You can also know what is the problem that it faced during my project time and you can also know the result of my project in the result part.

I would like to share my idea with anyone who are interested in this project.
