

# ULTRASONIC PEST REPELLENT

Prepared by: Lee Choong Hong

## ABSTRACT

---

The function of the circuit as well as the operation of the circuit will be explained below. Last but not least, the details of the components such as ICs that are used also will be discussed. Data sheet will attach in order to give clearer view or information about those ICs. I have subdivided the project report to a few sections in order to give a clear explanation about my circuit's operation. By reading through and understand all the section step by step, you will be able to understand the principle behind my project.

- Introduction
- How circuit work(Circuit diagram and block diagram)
- Components of the project (Data sheet is attached in the appendix)
- Research
- Problems and solutions
- Work done through 12 weeks
