

PLC – BASED CAR PARK SYSTEM

Prepared by: Lee Vun Bing

ABSTRACT

This project tile must be installed din all actual car park. By applying this project, car owner or driver can save a lot of money and their precious time when they looking for empty parking slot. This is because this project will show the condition of a car park, either it is full or empty parking slot still available. When the car park is full, an indicator light will be turned on to tell the car owner to look for another car park nearby. The car owner does not need to drive into the car park to find out the condition anymore.

So, is this project save your precious time and money?
