

EXTERNAL PHONE SWITCHER

Prepared by: Hew Kien Hong

ABSTRACT

Extension Phone Switcher... a circuit, which can disable other extension, phones when one of the phones is in use. It is very convenient for peoples who forgot more than one extension phones. Now, no need for us to worry about other people listens to our conversation by using the other extension phone.

Because it can keep our conversation private, prevent other people listen to our talk. Just connect the circuit between the phone line and telephone. It sure will work perfectly.
