

PORTABLE OZONE GENERATOR

Prepared by: Chung Ping Tong

ABSTRACT

This report is going to introduce about the project I did which is the portable ozone generator or generally speaking it is a small and handy unit hardware that to get ozonated air.

It is requires a small and handy unit to plug into mains to get ozonated air at suitable pressure, flowing out from a tube. It can then be let into environment or bubbles through water or any other polluted liquid. Bu the gadget must be complete safe to work with.
