

MICROCONTROLLER-BASED QUEUING SYSTEM

Prepared by: Goh Chee Boon

ABSTRACT

This report is going to introduce about the project I did which is the Portable Ozone Generator or generally speaking it is a designed for the convenience for the customers who are waiting to be served in any office (e.g. banks, post office, etc)

'HELLO' Welcoming Screen

When a customer first enters the office, the entrance display will show the welcoming wording 'HELLO'. Whenever no services is requested, whereby nobody presses any button, the wording 'hello will remain there.
