

INTELLIGENT SYSTEM IN A PASSENGER CAR

Prepared by: Lim Tzyy Shyang

ABSTRACT

The main objective of this project is to design a system that consists of the following features:

1. Reminds the driver to fasten the safety belt
2. Close the door
3. Pull up hand break
4. Close the window
5. Switch on the headlights when the day getting dark
6. Switch on the wiper when raining
7. Interior light on for a while when the driver closes the door

User will reminded either in sound or light or display information if detected position is incorrect as stated for different condition.
