PC BASED MESSAGE LEAVING SYSTEM

Prepared by: Ng Kah Hoe

ABSTRACT

This project report is to introduce the PC based message leaving system to all the readers. Firstly, it will present the introduction and objectives of this final project. Second, the scope of project will be introduced. Then, the construction of the hardware and the more detail explanation of it will be preceded. Next, it will go to the software of the project and some explanation on it. Later, the problems and solution will be discussed at the next section and the last one is the design of the PCB circuit board. Finally, I would like to apologize first for my grammatical mistakes that made in this project or some statement that might cause repugnance of a person. Thanks for anticipating my final report.
