

REMOTE CONTROL USING TELEPHONE LINES

Prepared by: Anto

ABSTRACT

The basic idea of my project is to control the appliances through the telephone lines. The users are able to switch on or off the appliances by pressing any number of telephones keypad except digit 0 or its acts as a normal conversation. It uses mostly in as home user and office to create flexibilities, easiness and safety.

Finally, the conclusion at the end of this report is based on my experiment in few weeks in the project lab and my home. Lot of problems has been troubleshooting but few problems I cannot get perfect solution.
