

PASSWORD DOOR SECURITY WITH 4X4 KEYPAD

Prepared by: Oghenevwogaga Izoma

ABSTRACT

This project report will explain how to create the electronic security system titled ***PASSWORD DOOR SECURITY WITH 4X4 KEYPAD***. The project will use PIC16F877A, LCD screen, keypad, magnetic lock, relay and buzzer to create this password door security system. The system will activate the relay and buzzer if the password which is pre-set in the program is keyed in correctly. Also included in it is an alarm system.
