

# PEOPLE BASED FAN

Prepared by: Zhu Jie Tong

## ABSTRACT

---

In the project People Based Fan is aimed to control the speed of the fan, and able to increase or decrease the speed of the fan depending on the number of people entering or exiting a room.

The expected outcome of this project is a controller that can change motor's speed and can programming.

In the conclusion, I have to find out the solutions from the websites and some reference books to complete my project.
