

# VEHICLE ADAPTER FOR NOTEBOOK PCS

Prepared by: Lim Ai Chin

## ABSTRACT

---

The title of my project is 'Vehicle Adapter for Notebook PCs'. It is a power electronic based project which required mostly the knowledge in power electronics.

The outline of this project will be presented by the Contents. It will show all the sections of this project and make it easy for readers to search for certain section when reading it.

After the content pages, it followed by the Main body of this project. In the body, it will contain an introduction of the project. In the introduction, the purpose of doing this project, the analysis as well as the design outcomes and more detail information about this project will be discussed.

At the conclusion it will summarize this report and give the project's major outcomes. Besides, it will also include recommendation for further work to be carried out where appropriate. Next a list of references will show all the relevant resources and research that I used to references for my project and followed by the appendix section.
