

SIMULATION OF MATERIAL RESOURCE PLANNING (MRP II) OF DOOR LOCK

Prepared by: Wee Lee Mein

ABSTRACT

This project is regarding the concept which I had been learned that used to simulate the Material Resource Planning (MRPII) by using computer simulation software – Fourth Shift Manufacturing System Software.

This project provides the fundamental knowledge about the implementation and execution of MRPII. Besides that, this project is also provide the example and why I choose the product as a doing this project. In addition, it's also including the utilization of the MRPII in the manufacturing environment, purpose, objectives and benefits.

Construction would be exposed including the procedure of key-in data, the problem encountered, and the project time schedule.
