

# **SOLVING INVENTORY AND MATERIAL HANDLING PROBLEM AT ASSOCIATED MOTOR INDUSTRIES (AMI)**

Prepared by: Goh Li Yong

## **ABSTRACT**

---

The comparison between the two graphs show that with the new improved method, the portability of the attractive items from missing has been reducing.

These methods not only make the job of the workers in the line become more specialized but also created an opportunity for the workers to prove their reliability and responsibility. The specialization occurs between the handymen and also the leading hand. On the old method, the handyman is the only person who is in charge of the attractive items but for the new improved method, the leading hand involves in taking charge of the items. The particular workers who assemble the time to the vehicles also take this responsibility.
