

MRP II

Prepared by: Lim Choon Hong

ABSTRACT

Basically, this project involves translating the management plan into detailed plan (Manufacturing orders & Purchase orders) by utilizing Manufacturing resource Planning (MRP II). Based on the output generates, we have to demonstrate how the action messages are to be executed. Before the plan is translated, the Bill Of Material (BOM) of the end item must be defined, identified the outstanding and purchase orders and provide a hypothetical inventory data for all items.

The MRP record was shown in the section result and analysis in orders to let readers to have a better understanding and clearance about the project I have done.
