

MOULD DESIGN FOR SPACE LOWER BODY

Prepared by: Abdullah Zulfairis Bin Zulkifli

ABSTRACT

In molding the main part is the injection machine and the mould. In this particular project I will emphasis in mould itself. The mould is the special tool in injection moulding. It is custom designed and fabricated for the given part to be produces when the production runs for that part is finished; the mould is replaces with a new mould for the next part. There will be various types of mould.
