

ERGONOMICALLY DESIGN OF A MOPPING SET

Prepared by: Lee Chin Yee

ABSTRACT

My title of this final project is 'Ergonomically Design of a Mopping Set'. On behalf of the title, I have to redesign a mopping set which include the mop and the pail based on the concept if ergonomic. In the progress of this project, I have studied the operation of mopping; I have also studies the conventional mopping set and determined the strengths and weakness of it. In addition, I done several researched on the human body, work posture an anthropometric data. I have also discovered the bad effects while using the conventional mopping set. Then, I gathered the information obtained from her researches and redesigned the conventional mopping set to meet the objective of my project. The general objective of my project is to make improvement on the conventional mopping set to that people feel comfortable and safe while using the redesigned mopping set.
