

FOOD HEATER FOR HIKING, CAMPING OR PICNIC USE

Prepared by: Yong Yoke Siam

ABSTRACT

This project in purpose to tell all the relevant information to the completion of food heater for hiking, camping or picnic use, including the use, concept, theory of material used observation and most of all the construction. The design of food heater is thinking of customer comfortable based on ergonomics factors. Before, there are no products, which can heat up food without using any cooking equipment and cooking utensil in real life, but my design does this. Hence, when people go to hiking, camping or picnic they no need to bring along all the heavy cooking equipment and cooking utensils just to heat up the food their bring along. By suing my new designed of food heater, what the user have to do is just add in some water into the specific whole f the food heater, then food will be heated in few minutes.
