

# DESIGN A DEVICE TO CHANGE THE FLUORESCENT LAMP

Prepared by: Ban Lee Haw

## ABSTRACT

---

The main purpose of project report is provides clear information of change '*Straight Type of Fluorescent Lamp*' use a special device. Nowadays people still using ladder for change light bulb. In this case, there is a lot of weakness for using this type of method. It many cause dangerous.

Mostly, when the light bulb was breaking down, the most opportunity changing the light bulb is man, if they are not at home, how? As requested by INTI College Malays, I have to design a device to remove and install 2 different sizes and maximum of 15 feet of florescent lamp and come out a prototype of my new design.
