

# **A DEVICE THAT EASES THE TRANSFERS OF A PATIENTS FROM WHEEL CHAIR INTO CAR OR VICE VERSA**

Prepared by: Lim Hui Yee

## **ABSTRACT**

---

This project report mainly is described an innovative design of a transfer device. It provides clear information of using this transfer device. The purpose of designing this device is there are a lot of weaknesses for the existing transferring devices. Thus, this project design is more effective one that can ease the care worker compare to others.

The report is the full description of the project that has carried out throughout this semester.
