

TYRE LIFTER

Prepared by: Antonius Ho

ABSTRACT

This project is all about **TYRE LIFTER**. A tyre lifter is equipment which is to lift tyre(s) and place tyre(s) in a proper arrangement. This tyre lifter also acts as a mean to arrange tyre(s) into tyres' rack.

The objectives of doing this type of project are to improve the handling of tyres and to apply hydraulic system into the lifting system. Due to the weight of the types(s), this type of lifter can aid human in reducing, fatigue and enhancing the efficiency of works.
