

HOVERCRAFT BODY DESIGN

Prepared by: Yee Wai Khuen

ABSTRACT

In this report, it describes the two main objectives of the project which includes design a recreational hovercraft body and building of the designed hovercraft body through moulding. As in introduction, the history and concept of hovercraft and some technical information about moulding are stated.

At the end of the project, a summary that includes the recommendation and comments about the project can be found in the conclusions; for anyone who may be interested on the source of information can be found in the list of reference.
