

DESIGN A WALKMAN WITH HUMAN FACTOR CONCERN

Prepared by: Chong Chun Keong

ABSTRACT

This project is to design a single unit of the Walkman itself excluding the earphone with the purpose of improving the efficiency and the comfortable while using it and carry it on our waist. This purpose can be served by trimming the body of normal type of Walkman into a new shape, which followed out waist's shape. It can simply say is a design of the initial Walkman to emphasize the ease of use with comfort and secure.
