

ERGONOMICALLY DESIGN OF SLR CAMERA

Prepared by: Chong Mei Yuen

ABSTRACT

By doing this project is to concern with the redesigning of SLR camera by taking consideration of human factors or ergonomically. I get an idea to make improvement the parts of the camera when I received some feedback from the public. Therefore, I come to the parts that have made improvement on:

- I. Handle
- II. Lens
- III. Control dial of the mode
- IV. Flash
- V. Eye-piece viewfinder
