

DESIGN OF A SURFACE MODEL OF A MOULD USING AUTOCAD

Prepared by: Sim Be Ling

ABSTRACT

The objectives of doing this project are:

1. Study how a mold is created
2. Study what are the important things need to consider when doing this project and the mold
3. Design a mold which is effective and useful
4. Know the type of process is available and how to choose
5. Study the drawing skill
6. Gain a working experience

During doing this project, I learn how to solve a problem and think independent. I know many things regarding the process, material in use of plastic.
