

# WELDING STATION DESIGN IN SCHOOL OF ENGINEERING AND TECHNOLOGY WORKSHOP

Prepared by: Mah Shee Yin

## ABSTRACT

---

*'Welding Station Design in School Of Engineering And Technology Workshop'* is the title of this project; this project is primarily concerned with the *ergonomic welding station design*. It is required to put the effort in focusing on the fitting characteristics of the workstation environment to the capabilities of user or welder.

The goal of this project is to provide a greater acceptance of the welding station in school of engineering and technology workshop. For making changes to the welding station is to help to ensure the comfort, health and safety of the welders as well as the people who are working around the welding station.
