CREATE A PROGRAM TO GENERATE DAILY PRODUCTION QUALITY CONTROL REPORT

Prepared by: Chong Lim Ping

ABSTRACT

This is a report for my final semester project in DIE. My project title is 'Create a Program to Generate Daily Production Quality Control Report'.

There are 3 main chapters in this report. Chapter is 'introduction'. In this chapter, I give a clear definition for my project title. I explain what is meant by software and production quality control. After that, I state the four main objectives to create this software. At last, I explain why I choose to use visual basic for this project. The main reason is VB is object-oriented (GUIs) programming tool.
