

DESIGN A COLLAPSIBLE BILL BOARD WITH SIZE 1.2 X 0.9 M

Prepared by: Tan Suit Nee

ABSTRACT

Generally, the collapsible billboard can be divided into 2 separate parts, which are top part and bottom part. The idea for designing this collapsible billboard is taken from the shape of umbrella in the night market. The bottom part of the bill board, which is the stand part of the billboard, can be adjusted. These adjustable characteristics allow more users and giving more comfort to the users.

Overall, the collapsible billboard is able to meet the wants and requirement of markets because it can reduce human energy and working time.
