

IMPROVING THE DESIGN OF WATER COOLER

Prepared by: Fu Way Fei

ABSTRACT

This report basically introduces ergonomic theories and how to apply these theories in a particular design. In this case, these theories are applied in designing a water cooler. It consists of information on the comparison between the existing water cooler, and my new and improved water cooler design.

This report consists of information regarding the special-added features and its purpose, as well as how the common problems faced by the users' can be overcome. It also show the comparison and analysis done based on the factors mentioned above.
