

DESIGN A TYRE CHANGING DEVICE FOR LADY AND ELDERLY DRIVER

Prepared by: Yap Chih Yuen

ABSTRACT

The following project report will describe in detail about my project. Generally, this project report consists of information on tyre changing device available in the market compared to my new and improved design. The main purpose of designing is to ensure that the lady and elderly driver are able to change the tyre by themselves, enhance the effectiveness and efficient of the tyre changing process, and reduce fatigue and stress.

This project report may help anyone who interested on my project title and providing clearer notes and instructions which is written in simple English. The information that is needed and the diagram for reference purpose are attached in this project report.
