

DEVELOP A QUALITY CONTROL PROGRAM BASED ON AN ACCEPTANCE SAMPLING

Prepared by: See Seow Pei

ABSTRACT

My project title is Develop a Quality Control Program Based on an Acceptance Sampling. The project content included the ways that acceptance sampling system carried out at several stages in manufacturing, inspection of incoming material and parts, process inspection of various points in the manufacturing operation, final inspection by a manufacturer of its own product. And the Pascal programming techniques are chosen to be used in order to perform the acceptance sampling plan.
