

ERGONOMICALLY DESIGN FOR THE MOTORCYCLE HANDLE BAR

Prepared by: Tham Mun Tart

ABSTRACT

The purpose of y project is to design a new motorcycle handle bar with new features that really comfort to the persons whom using this handle bar to their motorcycle. The cost to produce the proposed handle car which a single rod bar that the different angle are estimate around RM100.00. the new handle bar that I design also cans easily adjustable using my design of guiding tools to screw and unscrew the motorcycle clamps which is optional to use so can fast the adjusting job.
