

DESIGN OF FRUIT PLUCKER

Prepared by: Liew Chen Chuat

ABSTRACT

My project is regarding the design of a tool that uses to pluck rambutan. The idea behind is to ease the users when they doing the plucking task by reducing stress on their body. My design is especially concentrate on the upper body of a user. The parts of the body that I put more effort in reducing stress are as follows:-

1. Shoulder
2. Hand
3. Arms
4. Fingers
