

# **AUTOMATIC PLANT GROWING SYSTEM**

Prepared by: Ivan Tan Woei Ren

## **ABSTRACT**

---

This Automatic Plant Growing System is a system that could able plant to grow faster than before. This could be proven by giving them 24 hours of supply to the plant so that the plant could use the resources when it needed.

Basically, this report will give information on what is the student doing throughout the whole semester. Such as the result and analysis that obtain by the students and problems encountered by the students.
