

# **AUTOMATIC PLANT WATERING SYSTEM**

Prepared by: Jimmy Ong Eng Yew

## **ABSTRACT**

---

The project is about a system that will help the user to water their plants automatically without the operation of the user.

Basically, this project report will consist of the introduction, scope and objective of the Automatic Plant Watering System. Follow by the construction of the system and how this system will work. While in the research and analysis part, it will mention about the research that had been done and some analysis of the research such as the questionnaire. In the last part of this project report is about the problems encounters, recommendations and conclusion. It shows all the problems encountered during construction and the solutions for all of those problems. Besides that, the improvement being made will also be stated. While the conclusion is about the experience I gained from this project.
