

# IMPROVED CAFETERIA LAYOUT

Prepared by: Lee Cher Wee

## ABSTRACT

---

This project is basically done for all the cafeteria users. Currently the layout of the cafeteria is not very good. The layout of INTI cafeteria still can be improved to be better. This report will show the method to create a better layout.

This report includes the procedure to create the layout using the load distance analysis. There will also have figure for the existing layout and a few of new layout design. It also contents all the data (including the distance between the food stores, the customers flow and others) that needs for creating a new layout by using the load distance analysis. It will also include the calculation of construction for the alternative layout.
