

SETTING UP AN EMPTY WAREHOUSE FOR KELVILITE (M) SDN. BHD.

Prepared by: Chan Jun Sheng

ABSTRACT

This project is mainly to set up an empty warehouse by using Systematic Layout Planning method. The company that I have chosen to carry out my project is KELVILITE (M) Sdn. Bhd.

This project mainly consists of 3 parts which are introduction, construction, result and analysis.

Introduction part can be divided into several parts which are definition of title, objective, and the scope of the title, specific requirements and company background.

In the construction part, SLP method, guidelines for design warehouse layout, Gantt chart, problems encountered and solution had been introduced.

In the result and analysis part, the proposed layout for the display area and storage are had been introduced. Suitable storage and retrieval equipments had been determined. Cost for suitable storage and retrieval equipments had been computed.
