

# WATER TANK CLEANER

Prepared by: Wong Keng Huang

## ABSTRACT

---

Water Tank Cleaner provides much functions and efficiency to the users in many ages. So I have decided to design a Water Tank Cleaner that serves the users with maximum satisfaction.

The schedule of the project is enclosed to assists explanation of the progress flow of my project from the beginning until the end. And costs of the project will provide the list of price for each of component that I purchase for my prototype and will not out of my budget in order to do this project. Lastly, result of testing will prove the information about results after the cleaning process and also what kind of improvement that I can use for future enhancement in order to make the water tank cleaner more useful, powerful and more convenience.
